Design Guide Summary

- The minimum turning radius (inside) is 1.1 times of belt width under all feasible belt Width, 1.3 times of belt width is the most optimal.
- The minimum straight run section near driving shaft and idling shaft of Radius belt must be 2 times of the belt width in length.
- The minimum straight run section between two turns of opposing direction must be 2 times of the belt width in Length.

Guide Rail & Wear Strips

- We have different kinds of guide rail and wear strips for your choice; for more information, please consult our sales team.
